

Micronutrient

Inject-A-Min[®] Manganese

For Tree Injection Use In Liquid Loadable Injectors

Inject-A-Min[®] Manganese is a micronutrient formulation containing manganese sulfate in a completely enclosed micro-infusion system for palms, maples, citrus and other tree species growing in alkaline soils. Because the elements are placed directly into the trees vascular system, the benefits of Inject-A-Min Manganese can be evident for one to five years compared to adjacent untreated trees. Manganese deficiency is characterized by young leaves exhibiting darker green veins with a yellowing or loss of color between veins.

- Promotes growth
- Based on sulfated elements
- High level of manganese
- Long-lasting effect
- Completely enclosed, minimal risk application method

Guaranteed Analysis: Nitrogen (N) 1.00%
Potash (K₂O) 1.00%
Sulfur 1.90%
Copper 0.13%
Iron 1.67%
Manganese 1.00%
Magnesium 0.12%
Zinc 1.54%

Micronutrient Inject-A-Min[®] Manganese

Treatment Uses

Manganese Deficiency
Nutrient Deficiencies
Environmental Stress
Alkaline Soils
